

Software Developer

About Arfitect

Arfitect began operations in 2017 to create software solutions with cutting-edge technologies for enterprise companies all around the world. The prospective team will work with highly experienced professionals on software projects with various new challenges and exciting opportunities.

Arfitect particularly focuses on maintaining a "great to be part of" for its workspace and appreciates the value of talent and hard work. The prospective members of our team will enjoy a jubilant work environment where their work is valued, and a long-term career path is considered.

Essential Duties

- Developing and delivering projects (ASP.NET, SharePoint, etc) for clients as well as in house projects
- Design, build and maintain efficient, reusable, and reliable code
- Working on bug fixes, making sure all are completed in a timely manner
- Establish, troubleshoot and manage core application integrations with external systems

Requirements

- 2+ years of demonstrated experience in all areas of the Software Development Life Cycle
- Solid understanding of object-oriented programming concepts
- Experience with C# language, .NET Framework, and .NET Core
- Experience in web development, including ASP.NET MVC, Web Services, and Web API
- Working knowledge in front-end technologies JavaScript, JQuery, HTML/HTML5 and CSS
- Experience with relational database design and development (SQL, T-SQL)
- Knowledge of waterfall and agile project management methodologies
- Flexibility of providing support during odd hours, weekends, and peak seasons
- Ability to work in a decentralized team and communicate using virtual communications tools
- Verbal and written communication skills in English
- Ambition is key, a strong want to move up and learn from the seniors around you

Nice To Have

- Experience using team collaboration tools/source control programs (GitLab, Bitbucket etc.)
- Angular, React experience
- Experience with SharePoint Online, SharePoint 2019, SharePoint
- Experience with SharePoint Framework (SPFx)
- Experienced in Microsoft Power Platform applications and workflow tools (Microsoft Power Automate, Microsoft PowerApps, SharePoint Designer, Workflow Manager, Nintex etc.)

Education:

Bachelor's Degree in Computer Science, Information Systems or other related field from four-year College or University.
